

EMSE Title Page Draft V1

Date: 2026-06-05

Target venue: Empirical Software Engineering

Purpose

Provide the separate title-page and declarations file required for EMSE.

Title

Evaluating Protocol-Scaffolded Agentic Workflows Across LLM Providers

Author Line

Daniel Eric Fredriksen

Quantyra Inc, Nevada, United States

Chief Scientist, Quantyra

Corresponding author: dfredriksen@quantyra.org

Keywords

- agentic workflows
- empirical software engineering
- large language models
- protocol scaffolding
- reviewer-based evaluation

Declarations

Funding

No funds, grants, or other support were received for the submitted work.

Competing interests

Daniel Eric Fredriksen serves as Chief Scientist of Quantyra. The author declares no additional competing financial or non-financial interests.

Authors' contributions

Daniel Eric Fredriksen is the sole author and was responsible for the study conception, methodology design, benchmark execution oversight, evidence synthesis, and manuscript drafting.

Data, materials, and/or code availability

The benchmark packets, retained artifact chains, reviewer materials, manuscript supplement, and selected reproducibility scripts supporting this study are publicly available in the Protocol-Scaffolded Agentic Workflows Artifacts repository: <https://github.com/Quantyra/protocol-scaffolded-agentic-workflows>. The fixed paper-support release cited for this submission is version v1.0.7:

<https://github.com/Quantyra/protocol-scaffolded-agentic-workflows/releases/tag/v1.0.7>.

Ethics approval

Not applicable.

Consent to participate

Not applicable.

Consent for publication

Not applicable.

Use Rule

Use this file as the separate EMSE title-page and declarations source for the current submission packet.
